EZEE-DRI Industrial Absorbent for Liquids

“The environmentally responsible absorbent”

Distributed by:

Technical Information

Uses:

Cleanup spills

- Safe to use on oils, water, lubricants, solvents, coolants and other chemicals
- Silica free and asbestos free; health benefits for your employees
- Slip resistant for employee safety

Neutralize contaminates

- Immediate absorption
- Contains liquids fast
- Quick and easy clean up

Stabilize liquids

- Prevents leakage
- Retains most liquids
- Non-abrasive

Easy disposal and clean up

- Biodegradable
- Can be incinerated
- Stain and scour free
- High BTU / low ash

Product Information:

EZEE-DRI is an environmentally responsible product because it is made from wood waste not new wood. This absorbent is lightweight yet its uniquely designed granules can soak up more liquid than most products so you will use less.

EZEE-DRI is easy to clean up because it is lightweight and biodegradable. It also can be disposed of safely through the process of incineration.
