# Material Safety Data Sheet

Product: Hartland Tough Stuff
Date of Preparation: 04-14-06

## Section 1 – Chemical Product and Company Identification

Synonyms:	Not applicable - mixture
Form:	Liquid
CAS No:	Not applicable - mixture
Supplier:	Hartland Lubricants & Chemicals, 914 Commercial Court, Onalaska, WI 54650

### Section 2 – Composition / Information on Ingredients

%

CAS No

Ingredient Proprietary organic salt - low pH

#### None established

**Exposure limits** 

#### Water

# Section 3 – Hazard Identification

#### Emergency Overview

### 24 Hour Professional Emergency Resource Services (PERS) 800-633-8253 Primary routes of entry: inhalation, skin contact or eye contact.

Acute exposure: Skin irritant. Severe eye irritant. Harmful if swallowed.

HMIS Rating:	0 = Minimal	1 = Slight	2= Moderate	3= Serious	4 = Severe
Health = 2	Reactivity $= 0$	Fire = 0	Personal protect	ion: B (gloves	, safety goggles or glasses)

#### **Possible Health Effects**

Inhalation:	Inhalation of tract.	mist can cause coughing, choking, irritation of the nose, throat, and upper respiratory
Ingestion:		an cause immediate pain and burns of the mouth, throat, esophagus and al tract. May cause nausea, vomiting, and diarrhea, and in severe cases, death.
Skin Contact:		ness, pain, and severe skin irritation. Irritation effects can last for hours or days but ed to result in permanent damage.
Eye Contact:	Liquid and mi	st are irritating and may cause damage to the eyes.
Chronic Exposure:	Long term exp	posures seldom occur due to the irritating properties of the product.
Aggravation of Pre-existi	ng Conditions:	Persons with pre-existing skin disorders or eye disease may be more susceptible to the effects of this substance.

# **Section 4 – First Aid Measures**

Inhalation:	Remove to fresh air. Get immediate attention for any breathing difficulty. Administer CPR if needed.
Ingestion:	Do not induce vomiting. Give several glasses of water to drink to dilute product. Obtain immediate medical aid or call poison control. During spontaneous vomiting there is a danger of aspirating liquid into lungs, causing damage and chemical pneumonitis. If spontaneous vomiting occurs, keep head below hips to prevent aspiration and monitor for breathing difficulty. Gastric lavage should be performed only by qualified medical personnel.
Skin Contact:	Immediately flush skin with cool water for at least 15 minutes. Remove contaminated clothing and shoes. Obtain medical attention immediately if irritation develops. Launder clothing before reuse. Thoroughly clean shoes before reuse.
Eye Contact:	Immediately flush eyes with cool water for at least 15 minutes while lifting upper and lower eyelids occasionally. Remove contact lenses. Continue flushing and get immediate medical attention.

Phone: 800-658-9051

	Section 5 – Fire Fighting Measures
Fire:	Not flammable
Unusual fire / Explosion Hazards	Contact with soft metals can form flammable hydrogen gas.
Fire Extinguishing Media:	Use any means suitable for extinguishing surrounding fire. Foam, carbon dioxide, dry chemical water for, or water may be suitable. Water spray can be used to keep exposed containers cool.
Special Information:	In the event of a fire, wear full protective gear and NIOSH-approved self-contained breathing apparatus that is appropriate for the primary cause of fire. Containers can melt from the heat of fire. Prolonged contact with soft metals may produce hydrogen gas which is flammable.
	Section 6 – Accidental Release Measures
Isolate hazard area. Spills: Small spills: M Large Spills: E etc.) with inert lime) – heat is areas with clea	on. Ventilate area of leak or spill. Wear appropriate protective equipment as specified in Section 8 op thoroughly and rinse with water. vacuate area. Eliminate ignition sources. Block potential routes to water systems (sewers, streams material such as sand or dirt. Carefully and slowly neutralize with alkaline material (soda ash o created and can splatter and bubble. Containerize for reclamation or disposal. Wash down affected r water. CERCLA regulations require reporting spills and releases to soil, water, and air. Call loca sponse agency to report spill. I: Contact the proper county, state or federal authorities.

Keep out of reach of children. Keep container closed when not in use. Empty containers may contain product residues – observe all warnings and precautions. Store away from sunlight, sources of heat and incompatibilities. Best to store between  $20^{\circ}$ F and  $90^{\circ}$ F. At higher temperatures containers can swell – may need to be vented. Never add water to product – can cause uncontrolled boiling and splashing. Store in a cool, dry, ventilated storage area with acid resistant floors and good drainage.

# Section 8 – Exposure controls / Personal Protection

Airborne Exposure Limits:	See section 2
Ventilation System:	Local and/or general exhaust is recommended to keep exposure (mists) at a minimum.
Personal Respirators:	Respiratory protection may be required to avoid overexposure if ventilation is not sufficient to eliminate symptoms. NIOSH approved respirator with organic vapor cartridge.
Skin Protection:	Compatible chemical-resistant gloves and clean body-covering clothing. Maintain quick- drench facility in the work area. Rubber apron and boots.
Eye Protection:	Use chemical safety goggle or glasses. Maintain eye wash fountain in the work area.

# **Section 9 – Physical and Chemical Properties**

Appearance:	<b>Boiling Point:</b>
Clear amber liquid	Approximately 212°F
Odor:	Melting Point:
Slight	Approximately 0°F
Solubility:	Vapor Density (Air = 1)
Complete	No information
Specific Gravity:	Vapor Pressure (mm Hg)
1.133 – 1.40	No information
<b>рН:</b> 0.3 – 1.0	Evaporation Rate (BuAc=1) Slower than 1 % VOC 0.00%

Product: Hartland Tough Stuff

	Section 10	) – Stability and	Reactivity	y		
Stability:	Stable at room temp	perature. Containers bu	ild up pressure	when heated.		
Hazardous Decomposition Products:	ition Chlorine containing gasses. Nitrogen containing gases.					
Hazardous Polymerizations:	Will not occur.					
Incompatibilities:	Reactive with strong bases, metals, metal oxides, hydroxides, amines, carbonated and other alkaline materials. Incompatible with materials such as cyanides, sulfides, sulfites, and formaldehyde.					
Conditions to Avoid:	Heat, incompatibles	s, sunlight
